

UTT Chapter 11 Test

MULTIPLE CHOICE [Each question is worth 1 point.]

Choose the correct answer from the choices below.

1. **Which of the following is one of the seven characteristics that all living thing share?**
 - a. Metabolism
 - b. Growth and development
 - c. Reproduction
 - d. All of the above [11.2]
 - e. A and B only
2. **The belief that favorable traits can be passed on or eliminated from one generation to the next strictly by chance is called what?**
 - a. Gene flow
 - b. Genetic drift [11.3]
 - c. Mutation
 - d. Natural selection
 - e. None of the above
3. **The belief that favorable traits can be passed on or eliminated when a migratory group breeds with a native group is called what?**
 - a. Gene flow [11.3]
 - b. Genetic drift
 - c. Mutation
 - d. Natural selection
 - e. None of the above
4. **Darwin believed mankind had witnessed something like natural selection in which of the following?**
 - a. Gene flow
 - b. Genetic drift
 - c. Mutation
 - d. Selective breeding [11.3]
 - e. None of the above
5. **The lack of fossil evidence in the geological record spurred Stephen Jay Gould and Niles Eldredge to propose which of the following theories?**
 - a. Spontaneous generation
 - b. Punctuated equilibrium [11.3]
 - c. Natural selection
 - d. Neo-Darwinism
 - e. None of the above

6. **Secularists reject design because they have a prior commitment to what?**
- a. Materialism [11.3]
 - b. Non-naturalism
 - c. Supernaturalism
 - d. Anti-realism
 - e. None of the above
7. **Why was Marx so enamored with Darwin's theory?**
- a. Marx believed Darwinism made materialism plausible.
 - b. Marx believed Darwinism supported his theory that society also evolves.
 - c. Marx believed Darwinism justified his belief in an almighty God.
 - d. All of the above
 - e. A and B only [11.4]
8. **According to Postmodernism, evolution is a what?**
- a. Fact
 - b. Lie
 - c. Misunderstanding
 - d. Grand story [11.5]
 - e. None of the above
9. **Why do Postmodernists not view human beings as the pinnacle of evolution?**
- a. Postmodernists deny that God created humanity for a special purpose.
 - b. Postmodernists deny that there is such a thing as human essence.
 - c. Postmodernists deny that humanity is the planet's dominant species.
 - d. All of the above [11.5]
 - e. A and B only
10. **What is the ultimate goal of evolution according to New Spirituality?**
- a. Biological fitness
 - b. Survival of our species
 - c. Collective consciousness [11.6]
 - d. Communism
 - e. A and B only
11. **Which of the following worldviews deny materialism?**
- a. Islam
 - b. Christianity
 - c. Secularism
 - d. Marxism
 - e. A and B only [11.7]

12. Muslims are divided on which of the following issues?

- a. Evolution
- b. The age of the earth
- c. Materialism
- d. A and B only [11.7]
- e. None of the above

TRUE OR FALSE [Each question is worth 1 point.]

Indicate if each statement is true or false. If the statement is false, alter it to make it true.

13. Only Christianity and Islam are concerned with how life arose.

False: All worldviews [11.2]

14. The Islamic worldview tells the story of morally culpable human beings made in God's image for companionship with one another.

False: Judeo-Christian [11.2]

15. The Judeo-Christian origins perspective leads to a view that denies free will, the intrinsic value of human life, and traditional marriage.

False: affirms [11.2]

16. Most Secularists claim that evolution is a theory.

False: a fact [11.3]

17. Microevolution is a fact of science.

True [11.3]

18. According to the prevailing theory of evolution, life emerged from life.

False: nonliving matter [11.3]

19. Marx reasoned that if evolution could provide hardier species, then sociological evolution could provide a better state.

True [11.4]

20. Secularists tend to view evolution as progressing rapidly while Marxists tend to see the process as progressing more gradually.

False: gradually while Marxists tend to see the process as progressing more rapidly [11.4]

21. Many Postmodernists reject metanarratives openly but secretly harbor an affinity for the metanarrative of evolution.

True [11.5]

22. New Spirituality's view on evolution emphasizes a biological progression not a spiritual progression.

False: a spiritual progression not a biological [11.6]

23. According to New Spirituality, evolution moves us toward dividing with the energy of the universe.

False: uniting [11.6]

24. According to New Spirituality, when enough people have achieved higher consciousness, others will be absorbed into the enlightened collective consciousness.

True [11.6]

25. The Quran describes the universe as unordered.

False: as finely ordered [11.7]

26. Progressive creationism assumes that macroevolution is true.

False: Theistic evolution [11.8]

FILL-IN-THE-BLANK [Each question is worth 2 points.]

Fill in the missing word to complete each statement.

27. Eugenics [11.1] is a social movement advocating the genetic improvement of the human race.

28. Microevolution [11.3] is the belief that small, adaptive changes are capable of producing variations within the gene pool of a species.

29. Macroevolution [11.3] is the belief that small, adaptive changes are capable of accumulating over time to produce entirely new species.
30. Natural selection [11.3] is the process by which organisms better adapted for their environment tend to survive longer, reproduce, and pass along more favorable biological traits.
31. Selective breeding [11.3] is the process by which human beings selectively breed organisms with desirable traits to produce a line of offspring with the same desirable traits.
32. A(n) mutation [11.3] is a change in the genetic makeup of an organism.
33. Adaptation [11.3] is the process by which an organism or species becomes better able to survive.
34. The intelligent design movement [11.7] is a scientific movement that posits an intelligent designer best accounts for the information, design, and complexity found within life and the cosmos.
35. Young-age creationism [11.8] is the belief that God created the cosmos and all life in its present forms, in six literal days, around six thousand years ago.
36. Progressive creationism [11.8] is the belief that God created the cosmos and all life in its present forms, in progressive stages, over a long period of time.
37. Theistic evolution [11.8] is the belief that God created the cosmos and all life billions of years ago and then guided the process of evolution to produce the diversity of life we see today.
38. Spontaneous generation [11.8] is the belief that non-living matter produced living matter through purely natural processes.
39. Irreducible complexity [11.8] challenges the notion that complex biological systems could have gradually evolved because without all of the components functioning together, complex systems don't function.

SHORT ANSWER [Each question is worth 3 points.]

Answer the following questions with at least one sentence.

40. Define biology.

Biology is the study of life and living organisms. [11.2]

41. Define neo-Darwinism.

Neo-Darwinism is the belief that new species arise through the process of natural selection acting over vast periods of time on chance genetic mutations within organisms. [11.3]

42. Define punctuated equilibrium.

Punctuated equilibrium is the belief that evolutionary changes occur over relatively quick periods of time, followed by periods of time with little or no evolutionary change. [11.4]

43. Define anti-essentialism.

Anti-essentialism is the belief that entities don't possess essences; rather, an entity's identity is thought to be the result of social construction. [11.5]

44. Define spiritual evolution.

Spiritual evolution is the belief that humanity is continually progressing toward higher consciousness. [11.6]

45. Define special creation.

Special creation is the belief that the cosmos and all life were brought into existence by the creative act of God. [11.8]

ESSAY [Each question is worth 4 points.]

Answer the following questions with at least one paragraph.

46. How does the theory of punctuated equilibrium attempt to explain the missing fossil evidence for the theory of evolution?

According to the theory of punctuated equilibrium, the reason we find so few transitional forms in the geological record is because evolutionary changes do not occur gradually over long periods of time. According to this theory, changes occur relatively quickly within a species, thus leaving limited transitional fossils in the geological record. [11.3]
